Gulf Regional Sediment Management Master Plan Case Study Compilation

Habitat Conservation & Restoration Team (HCRT) of the Gulf of Mexico Alliance (GOMA) Governor's Action Plan II

Twelve case studies of selected dredging projects, federal navigation projects, and others have been compiled for inclusion in the Gulf Regional Sediment Management Master Plan (GRSMMP). Cases studies were selected by the HCRT GRSMMP Subcommittee to provide examples from around the Gulf that demonstrate the beneficial application of regional sediment management principles in projects along with some where opportunities may have been missed.
